[ACME Group](#) is planning to set up a green ammonia project at the Port of Duqm in Oman. The plant will be an integrated facility using solar and wind energy to produce green ammonia. As a result, it will produce 300 metric tons per day of the clean fuel.

In addition, ACME says the facility will be exporting green ammonia to Europe and Asia. It will also be the first project of this scale.

Under the new deal, [KBR](#) will specifically provide technology license, engineering, proprietary equipment, catalyst, and commissioning services.
