/ Scatec and ACME partner for a solar and green ammonia project in Oman

Scatec and ACME partner for a solar and green ammonia project in Oman

8 Mar 2022

The Norwegian solar developer Scatec has signed an agreement with the Indian ACME Group to establish a 50:50 joint venture to design, develop, build, own and operate a 100,000 t/year green ammonia project in Oman, which would include around 300 MW of electrolyser capacity and would be powered by 500 MW of solar capacity in a first phase. The project, which is expected to produce up to 1.2 Mt/year of green ammonia, will be located in the Dugm Special Economic Zone of Oman.

Interested in Power Plants? (</research/power-plant-database.html>)

Enerdata has developed a market research service to screen, monitor and analyse the development of *power generation*

(<https://www.enerdata.net/research/energy-market-data-co2-emissions-database.html>) assets.

Power Plant Tracker offers an interactive database and a powerful search engine covering *power plants* (</research/power-plant-database.html>) worldwide – including both installed and planned capacities for renewables and fossil fuels.
